PROFILE

Insightful, result driven IT professional, with notable success directing a broad range of cooperate IT and security solutions initiatives while participating in planning, analyzing and implementing solutions in support of business objectives. Excel at providing comprehensive network design, system analysis, and full life circle project management.

Hands on experience, leading in all stages of system development efforts, including requirements, definitions, design, architecture, testing and support. Outstanding project leader, able to coordinate and direct all phases of project based efforts, while managing and motivating teams.

STRENGTHS

- Ability to try out a task that had been termed "impossible".
- Result-oriented, team-spirited and self-motivated.
- Ability to learn quickly, master new concepts and adapt to new environments.
- Excellent communication, interpersonal and numerical skills.
- Computer-Literate
- Excellent supervisory ability
- Hands on experience in tools and device operations

OBJECTIVE

To gain employment in a professionally and intellectually stimulating environment where individuality, originality and organizational abilities would be fully appreciated, encouraged and rewarded. Also to make an impact that will outlast my stay in any organization and/or team I work with.
