### **PERSONAL PROFILE**

I am an efficient individual, who offers knowledge and experience in marine electrical engineering, having 7 years of deep sea-going experience on Liquefied Natural Gas (LNG) tankers. In the course of my electrical engineering career, I worked in a multinational LNG company; Nigeria Liquefied Natural Gas (NLNG) Ltd. whose business was to transport LNG from Nigeria to buyers in Europe, the Americas and Asia.

As an electrical officer I was responsible for the technical maintenance of all electrical equipments and machineries related to the safe transportation of Liquefied Natural Gas on gas tankers.

In the year 2011 I have being working with JOENEZER NIG LTD, a company that work with some leading companies in the construction industry, providing electrical and mechanical solutions for both newly built and refurbished projects.

I am also an effective and enthusiastic, well motivated team player who is able to work as part of a team to achieve company's goals through self-motivation and dedication while maintaining a high quality standard in order to maximize profits and improve market value.

### **SKILL SUMMARY**

- A hardworking, organized and reliable individual with good track records
- An HND graduate in Electrical/Electronics Engineering
- A versatile and enthusiastic individual with a good work experience background
- Good leadership skills
- Able to work on own initiative and as a part of a team
- Good organizational skills and a good level of computer literacy
- Good and strong written and verbal communications skills
- Good interpersonal skills
